Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 5 is objected to because of the following informalities: Claim 5 depends upon itself. Appropriate correction is required. (Note: In order to advance the prosecution, it will be assume that claim 5 depends from claim 4.)

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Ackerman '670. Ackerman discloses a rear-tine tiller (as seen in figure 1) comprising a chassis 10 having a forward end and a rearward end, a set of rotating tines 22 at the rearward end, a set of ground engaging wheels 17 between the forward end and the tines and an engine 11 for driving the wheels and the tines (as shown in figure 2), the engine having a substantially vertically disposed drive shaft 42.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ackerman '670 in view of Kesting '253. Ackerman discloses the claimed device substantially as discussed above but fails to show the use of a water ballast tank. However, Kesting teaches that it is well known to use such a ballast tank (figure 48 and column 5, line 43) in concert with a rear tine tiller. It would have been obvious to one having ordinary skill in the art at the time of the invention to provide the tiller of Ackerman with the teachings of Kesting in order to provide a tiller having greater operational range and effectiveness.

Allowable Subject Matter

Claims 1-4 and 6-9 are allowed.

Claims 11 and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
